

HUBER
BRAU

Das Bier von hier.

Here's the truth and nothing but the truth

Here, 27 m above the rooftops of St. Johann, we have a different viewpoint of life. Here beer and social gatherings reconcile people. Here there are no social differences and it's what we have in common that counts above everything else.

We want to reflect this simple philosophy of life in our small menu and great beers. It's all genuine and all Tyrolean. We hope to have tickled your taste buds.

Here to genuineness and your health!

For 9000 years beer brewing was women's work.

The brewing tradition is always associated with monks. Actually, that has been true for only 1000 years now. 9,000 years before that brewing was clearly women's work.

Today this is still the case in many African and Latin-American cultures. However, we do not know how beer tasted back then.

But for whoever is interested: head on over to Africa!
